Mobility	Liquid under most environmental conditions. Floats on water. It is absorbed by soil and will not be mobile.
Persistence/ Degradability	Not readily biodegradable. Major constituents are expected to be inherently biodegradable, but the product contains components that may persist in the environment.
Bioaccumulation	Has the potential to bioaccumulate.
Ecotoxicity	Poor soluble mixture. Practically non-toxic to aquatic organisms. May cause physical fouling of aquatic organisms.
3. DISPOSAL CONS	IDERATION
Product Disposal	Used or waste oil should be recycled or disposed off in conformity to local disposal regulations. Contact local authorities for approved disposal contractor.
Container Disposa	Empty drums should be completely drained and sent to a drum reconditioner or properly disposed of. Non-reusable small containers should be recycled or disposed of. Ensure conformity to local disposal regulations.
Container Disposa	properly disposed of. Non-reusable small containers should be recycled or
